

BIOFORS ND-IB-EDS LASOTA

Generic Name:

BIOFORS ND-IB-EDS Inactivated Oil Vaccine

General Description:

BIOFORS ND-IB-EDS LASOTA contains inactivated Newcastle Disease Virus (NDV) LaSota strain, Infectious Bronchitis Virus (IBV) M41 strain, and Egg Drop Syndrome Virus (EDSV) in stable oil emulsion. NDV LaSota strain, IBV M41 strain were amplified in embryonated chicken eggs, whereas EDSV was amplified in embryonated duck eggs. Allantoic fluids of embryonated chicken eggs containing amplified NDV LaSota strain, IBV M41 strain and allantoic fluids of embryonated duck eggs containing amplified EDSV were harvested and inactivated. Oil adjuvant was then added. The vaccine has a physical appearance as white oil emulsion.

Composition per Dose (0.5mL):

Newcastle Disease Virus LaSota strain.....	$\geq 10^{8.5}$ EID ₅₀
Infectious Bronchitis Virus M41 strain.....	$\geq 10^{6.2}$ EID ₅₀
Egg Drop Syndrome Virus.....	$\geq 10^{7.7}$ EID ₅₀

Indication for Use:

Prevention of Newcastle Disease, Infectious Bronchitis and Egg drop Syndrome in poultry.

Method of Vaccination:

Administer 1 dose (0.5 mL) to each layer chicken at 12 weeks of age or older via intramuscular injection.

Withdrawal Period:

12 weeks

Storage Conditions:

Store in a dark place at 2-8°C. Do not freeze.

Packaging:

1000Doses/500mL/Bottle

Shelf Life:

2 years

Precautions:

- Follow instructions from and use under supervision by a veterinarian.
- Recover vaccine to room temperature before use.
- Shake well to mix thoroughly before use
- Protect vaccine from sunlight and high temperatures.
- Vaccinate healthy chickens only.
