

BIOFORS SE GEL

General Description:

BIOFORS SE GEL is an inactivated vaccine which contains inactivated *Erysipelothrix rhusiopathiae*. The vaccine is produced by amplifying *Erysipelothrix rhusiopathiae* in culture medium. Culture medium containing amplified *Erysipelothrix rhusiopathiae* is inactivated by formalin and then centrifuged. Aluminum hydroxide gel is added as adjuvant. The vaccine has a physical appearance as liquid suspension.

Composition per Dose:

Erysipelothrix rhusiopathiae CJTS strain..... $\geq 2.5 \times 10^{10}$ CFU

Indication for Use:

Prevention of Swine Erysipelas in swine.

Method of Vaccination:

Shake to mix the vaccine thoroughly before use. Administer via intramuscular route.

Piglets: Administer 1st vaccination of 1 Dose to each piglet of 4 weeks of age or older. Administer 2nd vaccination of 1 Dose at 3-4 weeks post-1st vaccination.

Sows: Administer 1st vaccination of 1 Dose to each sow at 7-8 weeks before farrowing. Administer 2nd vaccination of 1 Dose at 3-4 weeks before farrowing

Withdrawal Period:

6 weeks

Storage Conditions:

Store in a dark at 2-8°C. Do not freeze.

Packaging:

10 Doses/20mL/Bottle, 20 Doses/40mL/Bottle, 25Doses/50mL/Bottle, and 50Doses/100mL/Bottle

Shelf Life:

2 years

Precautions:

- This vaccine is for veterinary use only.
- Use under supervision by a veterinarian
- Allow the vaccine to recover to room temperature before use when they have been taken out of a refrigerator.
- Protect vaccine from high temperatures and direct sunlight
- Shake to mix thoroughly before use. The vaccine will form precipitates when left to stand for a long time.
- Vaccinate healthy swine only.
